The art of watchmaking first gained a foothold in the mountainous Jura region of Switzerland more than 200 years ago. In those days farmers often learned this craft as a means of filling the long winter months and boosting their meagre income. For some of them, this challenging and highly sophisticated craft became a true passion.

The Hasler family was a family of four brothers. The youngest, Abel Frédéric Hasler, began manufacturing small series of silver pocket watch cases with the greatest precision craftsmanship from 1861. Six of his sons went on to inherit his watchmaking talent.

For one of his sons, Paul Hasler, watchmaking became both a passion and a vocation. Upon completing his watchmaker training, he saved up a little capital and a few years later, was able to found his own business, Paul Hasler Terminages d'Horlogerie, which specialised in watch assembly for a range of prestigious watch brands.

David Hasler, who had already worked for his brother Paul as technical director for many years, joined the company in 1946. This partnership marked the beginning of Hasler Frères. Business continued to prosper. In 1961, a third generation of Haslers, Wilfred and Eric Hasler, joined the business as joint partners.

1993 marked the beginning of sustainable development of the DAVOSA brand. 1993 was also the year in which Hasler & Co S.A. began cooperating with watch distributor, Bohle GmbH, who had been active on the German market since the 1960s. The high-quality collection of mechanical & Quartz timepieces under the brand name DAVOSA became a resounding success. Watch retailers and aficionados alike appreciated the combination of superior workmanship, high mechanical precision and contemporary design just classic enough to endure.

The success of this first collection prompted further successful series. Today the DAVOSA brand, carried by an independent, family-run company, has a global presence and is an integral part of the watch world.

Dear Watchlover,

we would like your timepiece to be a reflection of you. Your DAVOSA watch - with its refined aesthetics - will not only reflect a facet of you today but also in years to come. This durability is nothing without the ultimate in technical precision. A design that incorporates the spirit of the age without being trendy is the other maxim.

We trust that this catalogue will help you to choose the „right one“. We wish you a very pleasurable read.

Kurt Wittwer / President

Cornelia Bohle / CEO
